Zero Gravity

UltraComfort America's patented positioning technology sets new standards for comfort. The positioning of a StellarComfort chair allows for a greater range of positions at the touch of a button. These positions may help improve circulation, relieve back pressure and enhance comfort. Experience the difference of this unique motion technology available in multiple sizes.

The front of the arm and side wings of the backrest are finished with nailhead trim for a tailored look.

### User-friendly feature of every UltraComfort recline chair:

Easy to use battery backup system. Each UltraComfort recliner has a battery backup system in the electrical transformer which operates on two 9 volt batteries. In the event of a power failure, the battery system will raise the chair from the reclined to the seated position. The batteries should be replaced after one use.
